The Periodic Table of Chemical Elements is an awesome display of coherence and complexity. *Artistic Alchemy: A Painter’s Periodic Table* expresses and celebrates artistic features of the Periodic Table. It is a series of 118 paintings, each depicting an abstracted and embellished version of the unique letter-number combination that is code for one of earth’s discovered or synthesized chemical elements. The paintings are in mixed media—mostly acrylics but some oils, along with collage and pen & ink. With each painting, there is a short statement about how the chemical got its name and how it is currently being used.

**Artist: Joyce Nielsen**

**On Display June 3 to August 31, 2018**

Health Sciences Gallery

**Reception:** Sunday, June 3, 2-4 pm

University of Colorado Anschutz Medical Campus

12950 E Montview Blvd., Aurora 80045
